

# FOAM TOTE COVERS

NME080

- Marine Grade Harsh Weather Rated
- Waterproof
- Internal Protected Seams
- UV Resistant Non-Fading
- No Removal Necessary During Operation
- Over the Road or Stationary Applications
- Easy Washdown, Lightweight Easy Store Fabric

## Description

The National Foam Tote cover is a simple, affordable but effective product used to protect foam totes from rain, snow, ice, ultraviolet rays and heat. Versions are available for both 275 and 330 gallon totes and are manufactured using red waterproof marine fabric. Tote covers are complete with hook and loop style strips to facilitate easy installation and removal and are suitable for over the road transport.

## Features

- Waterproof Marine Grade Fabric
- Foldable for Stowage
- No Tools Required
- Hook and Loop Closures
- Light Weight
- UV Resistant
- Affordable
- Fast Installation / Removal
- Standard Tote Sizes Available

## Use

Cover is installed by sliding over the top of the tote and securing the hook and loop closures to ensure a secure fit onto the tote. Removal is simply the reverse of installation.

## Storage

To extend the life of the cover when not in use clean, dry and fold the cover at room temperature into a neat fold and stow in a protected secure area such as a truck compartment or storage room.

## Purchasing Specification

The tote cover shall be assembled using marine grade, UV resistant, all-weather fabric. The material shall be of a blended-through color and not a painted or coated color. The material shall be non-fading, non-stretch and non-fraying. Closures on the cover shall be commercial grade hook and loop strips. The cover shall be designed to slide over and cover entirely, either a 275 gallon or 330 gallon ISO storage tote easily and be affixed quickly without tools. The cover shall be designed to be able to be used in stationary applications for Fire Fighting, in Mobile Applications where totes are transported over the road, and in storage applications. The construction of the tote cover shall be sewn in such a way that structural sewn threaded seams are internal to the cover and do not leave thread exposed to the elements. Closeable openings shall

be provided for user access to tote cap (On Top) and valve area (Lower Front) without removing the tote.

## Material Specification

National Foam tote tank covers are made of a waterproof marine grade fabric designed to protect from the harsh marine environment. This all-weather fabric is built to withstand the rigors of marine and outdoor environments and stand up to intense sun and harsh weather without fading, stretching, or fraying.

## Dimensions

275 Gallon Cover: 48" L x 40" W x 46" H
