

BLADDER TANK FILL PUMP KIT WITH COMPRESSOR NPR370

- Compatible With All Foam Concentrates
- Compatible With All Bladder Tanks
- Convient Kit To Make Filling Bladder Tanks Easy And effecient
- Flow Rate Designed To Minimize Frothing When Filling From Bottom Up

Description

To properly fill bladder tanks it is necessary to have an air source to float the bladder and a device to pump the foam concentrate into the tank. National Foam has assembled a complete kit of items necessary to properly fill the bladder tank. This kit consists of a low pressure foam pump, air compressor, pick-up tube with suction hose, pump discharge hose, fill manifold with pressure gauge and necessary fittings to connect to the tank, and water drain/ fill and vent hose.

Features

Complete package of equipment necessary to fill bladder tank in locations where no shop air is available.

Applications

Specifically designed for filling bladder tanks.

Specifications

The Bladder Tank Fill Kit with Compressor is a complete connection and fill package for use in areas were air pres- sure is not available. The kit shall include the necessary pump, compressor, hoses and fittings to properly fill a bladder tank from pails, drums or totes.

The kit shall consist of the following components:

- Foam Concentrate Fill Pump with a capacity for 20 GPM @ 17 PSI
- Air Compressor rated at 0.35 CFM @ 20 PSI

- 1/4" Heavy Duty Air Supply Hose
- 1" x 41" long PVC Pick-Up Tube with 72" long x 1" Clear PVC suction hose with brass fittings. Hose is reinforced with helically-wound spring steel wire
- 1" Clear PVC, reinforced with helicallywound spring steel wire discharge hose with brass fittings, 180" long
- 1" Fill Manifold with 0-60 PSI pressure gauge, 1" brass foam shut-off valve and 1/4" brass air shutoff valve
- (2) Lengths of 3/4" x 25 Ft. Water Drain/Fill/Vent Rubber Hose with 3/4" NH x 3/4" NPT brass adapters

The necessary fittings are provided to allow connection of the Fill Manifold to the bladder tank foam concentrate drain/fill valve and for connection of the foam concentrate supply line and the air pressure supply line to the Fill Manifold.

Technical Information

Pump:

Type:Self Priming, positive displacement
Capacity:
Ports: 1" FNPT
Materials:
Body:Bronze
Impeller:Nitrile
Shaft: Steel with special 316 SS sleeve
Seals: Mechanical lip seals
Motor:

<u>Air Compressor:</u>
Type:Diaphragm type, oil-less permanently lubricated, maintenance free
Capacity: 0.35 CFM @ 20 PSI (max pressure, 35 PSI)
Outlet:1/4" FNPT
Materials:
Body: Die cast aluminum
Reed Valves: Stainless steel
Bearings: Ball
Motor: 1/12 HP, 1/60/120VAC, thermally protected with automatic reset with 6 ft. cord & plug
<u>Pick-up Tube:</u> Material: PVC
<u>Suction & Discharge Hose:</u> Type:Heavy wall vacuum and transfer hose
Size - Suction: 1" X 72" Long
Size - Discharge: 1" X 180" long

Connections: 1" MNPT X 1" JIC

Temp Rating: 25°F (-4°C) to

Hose:.....Clear PVC,

Swivel

Pressure Rating: 100 PSI @ 70°F (20°C)

150°F (65°C)

45 PSI @ 122°F (50°C)

reinforced with

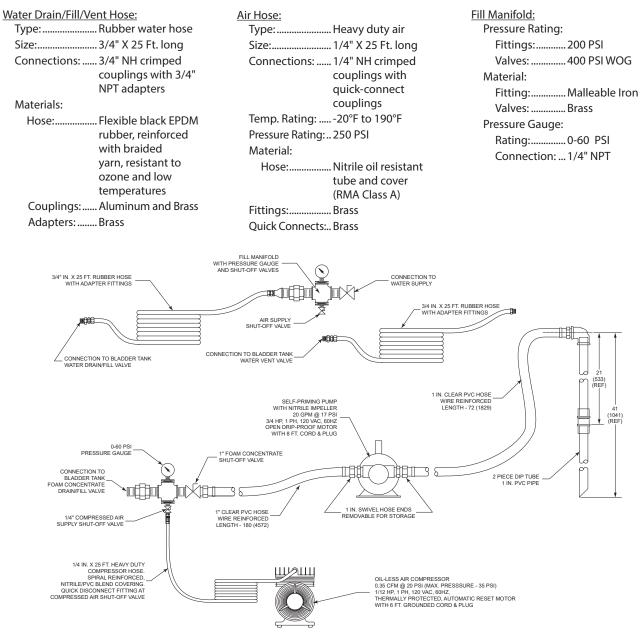

helically-wound

spring steel wire Fittings:.....Brass

Materials:
